

The Henley College – Curriculum Planning Document

The Henley Quad

Purpose

- What is the purpose of this curriculum?
- What knowledge, skills and behaviours does it develop?

Practice

- How do the students engage meaningfully with the content?
- How is guided and independent practice structured and developed?

Progress

- How do we systematically review of the impact of teaching and learning?
- How do students understand their own progress and the next steps required?

Potential

- How does the curriculum link to future opportunities and engage with employers & higher education?
- How do we develop key employability skills, including, English, maths and IT?

The Skills Builder Partnership

Listening	This skill is all about being able to effectively receive information - whether it comes from customers, colleagues or stakeholders.
Speaking	This skill is all about how to communicate effectively with others, being mindful of whether they are talking to customers, colleagues or other stakeholders and in different settings.
Problem Solving	This skill focuses on how to solve problems, recognising that while part of Problem Solving is technical know-how and experience, there are also transferable tools that individuals can develop and use.
Creativity	Creativity is the complement to Problem Solving, and is about generating innovations or ideas which can then be honed through the problem-solving process
Staying Positive	This skill is all about individuals being equipped to manage their emotions effectively and being able to remain motivated, and ultimately to motivate others, even when facing setbacks
Aiming High	This skill is about being able to plan effectively - both to achieve organisational goals, and also to set their own personal development targets. Initially, this is about knowing when something is too difficult, and having a sense of what doing well looks like for an individual
Leadership	This skill is relevant not only for individuals in positions of management with formal power, but also for individuals working with peers in teams.
Teamwork	This skill applies to working within both formal and informal teams, and also with customers, clients or other stakeholders. Initially, this is about individuals fulfilling expectations around being positive, behaving appropriately, being timely and reliable and taking responsibility. This extends to understanding and respecting diversity of others' cultures, beliefs and backgrounds.

Overview of the Week

Week	Questions / Objectives	Key Content	Skills & Behaviours	Review & Assessment
1.	Welcome Day	<p>Getting to know one another</p> <p>Settling into life at college</p>	<p>Making friends</p> <p>Living College Values</p>
